### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,2,4,5,11,13,14,18 and 19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Prabhu et al (5,870,323).

Prabhu et al discloses in figure 2 an iterative divide and square root processor including a plurality of summing devices (carry save adders) for generating partial remainders, shifted partial remainders (multiply by two), and selectors (quotient selection logics) coupled to the summing devices for selecting a quotient bit during a divide operation or a result bit during a square-root operation as claimed.

3. Claims 3,6-10,12,15-17 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
